

As a: Software Developer

I want: To obtain student data from the registrar

So that: Students do not have to manually input their academic history

Acceptance Criteria

- Is the data secure?
- Is the affected student informed of the data access request?
- Is there a way for the student to allow/deny data access?
- Is the method of transferring data from the registrar secure?
- Is the data password protected?
- Is the registrar office properly informed of the reason data is being requested?
- Is the registrar office confident in the security of any obtained data?
- Does the University permit the sharing of student data to another department?
